## PROJECT

### Technical Resources/News Website

Mar'23

- The primary objective of project is to empower users on a technical resources and news website to easily search for their specific areas of interest and gain access to comprehensive resources and articles related to those topics.
- Implemented robust pagination and search functionality to facilitate a seamless user experience, built by using React.

### Quotes Generator

Feb'23

- Designed a single page application using React and API that generates random quotes from an external API.
- Optimized for performance and responsiveness that works seamlessly on all devices, including smartphones, tablets, and desktops.

### Stone Paper Scissors – Game

Oct '22

- A web page that displays the game interface and allows users to play against the computer.
- Added Javascript functions that randomly selects one of the three hand gestures as the computer's choice.

### Clone of UsabilityHub Website

Aug'22

- Built a clone of UsabilityHub from scratch as a learning exercise.
- Gained valuable experience with web technologies and frameworks, and the ability to create UI using HTML, CSS.
